

NORFED REPORT:
VOL. 2 NO. 12
DECEMBER 2000

EDITOR'S NOTE: T'is the night before Christmas... as I invite you to familiarize yourself with 3PSecure.com, pick up the news, read two articles and get ready for 2001...

TABLE OF CONTENTS:

1. 3PSecure.com
...Just what you are looking for?
2. Cool new site just for NORFED at: norfed@topica.com.
3. Daniel New becomes a Redemption Center
4. RC in Germany...but No Delaware RC yet...
5. Question of the Month: About the ALCheck
6. First Annual Philadelphia Freedom Conference with Ed Griffin
7. Quote of the Month by Goethe
8. "Americans are renting our money"
Important

acknowledgment

9. **"Renegade employers openly defy IRS"**

Important article

10. Personal...Plus changes made to "Christmas"...

1. **3PSecure.com...Just what you are looking for?**

Over the past two years while touring for NORFED, I have had the same criteria asked of me. When are we going to have a value backed currency that can be used on a daily basis, i.e. one that is more than an educational tool? Most people hip to the situation wanted something akin to an institution that is usually called a "bank" to fulfill all those functions. And as we all know, the banks of today are nothing more than a front for the government and its agenda. And in addition to bank type services, everyone wanted privacy and if it was not to be found within the good old

USA, then they were willing to go wherever it was to be found. So with this issue of the NORFED Report, I am happy to inform you, that your prayers have been answered with the advent of 3PSecure.com that will provide Privacy, Protection, and Profit - securely as close as your computer - worldwide in January.

3PSecure.com, Ltd. is definitely not a bank. It is an Internet based international financial services firm. Its mission is to provide financial services the "3PSecure" way in a technologically secure environment that emphasizes the three P's of financial Privacy, Protection from confiscation, and Profit from accumulated assets. They strongly feel that this mission cannot be accomplished in today's political climate without a careful choice of jurisdiction, both for incorporation, management and Internet connection. To that end, 3PSecure.com, Ltd. is an International Business Corporation (IBC) chartered in the

Commonwealth of
Dominica, and all
personnel and
operations are located
in their Roseau office,
Dominica, West
Indies.

3PSecure.com's
inaugural service is
3PGold.com, enabling
everyone to buy, sell
and store gold -
around the world,
around the clock. All
gold that is not
delivered is
independently stored
in an allocated,
insured, treasury
grade vault in
Switzerland that is
independently audited
monthly. Sound
familiar?

In addition to the
secure and private
purchases of gold,
Clients can also use
the 3PGold.com
interface to access a
network of carefully
selected associates for
other financial
services, including
establishment and
maintenance of trusts,
brokerage services,
credit cards, and
specialized mutual
funds. Clients can
make a sale from their
gold holding at any
time to fund services
from the 3PGold.com
associates or any
other provider of your
choice. We're

committed to minimizing barriers to Clients' use of their gold as they see fit. For example, you will have five ways to use your gold:

i. Take physical delivery: The specially minted *Gold Internet Dollar* (GID) consists of one Troy ounce of .9999 fine gold will trade for a very low premium over the spot price of gold.

ii. Order 3PGold bearer certificates: Each paper *3PGold Certificate* is 100% backed and redeemable for one *Gold Internet Dollar* by bearer on demand. The attractive Certificate uses the most advanced anti-counterfeiting technologies so it can not be duplicated, replicated, or reverse-engineered. The *3PGold Certificate* can not be counterfeited and

will trade for a low premium over the spot price of gold.

iii. Create an Internet Delivery Order: 3PGold has created a special *Internet Delivery Order (IDO)* that is modeled on the old MDO by Mocotta. This new IDO turns a regular floppy disk into a receipt for a specified amount of gold in a cryptographically secure manner. An explanation, instructions and the IDO software manager is available on each IDO and for your review and use of this technologically sophisticated form of 3PGold.

iv. Keep your 3PGold in the vault: Retaining a balance of 3PGold with zero storage costs, one hundred percent backing and delivery from an allocated account, with a

monthly
independent
physical audit,
and complete
privacy for all
your
transactions. All
of these all
excellent reasons
to consider
retaining a part
of your portfolio
in 3PGold.

v. Use your
3PGold towards a
bank account:
3PGold.com is
much more than
just a convenient
means by which
to purchase gold.
Through the use
of an
international
3PTrust, you can
fund a bank
account, assign
your gold as
needed into the
account and
receive a foreign
credit card that
allows you the
security of gold
and the
convenience of
using your
money in any fiat
currency,
worldwide.

You may also sell
your gold at any
time and
distribute the

proceeds via
bank wire as you
direct, participate
with one of
3PSecure.com's
international
financial service
providers or
make any other
investment of
your choice.

Just as I developed
NORFED by
networking my
national contacts just
before I retired from
the Royal Hawaiian
Mint, I have
networked my
international contacts
at the request of a
group of staunch
freedom loving
marketteers who
formed
3PSecure.com. I hope
you will check into
this exciting new way
to re-establish your
God given
unalienable rights and
take control of your
money. Please contact
3PSecure.com or go
directly to
3PGold.com in
JANUARY for
Privacy, Protection
and Profit that are no
longer available from
the current banking
regime. You will find
everything you want
for your money, plus
much better gold
prices and leading
edge uses that are not

currently available from anyone. Please do not be confused, I am still the Senior Economist at NORFED which still excels as a quality silver alternative and presents a unique Solution to reform the current banking regime through the use of the proactive and educational American Liberty Dollar.

2. **Cool new site just for NORFED at "Topica"**

As we have discussed for some time it sure would be great to get together with other Redemption Centers, share notes, pick up tips and help grow the movement to return America to value. Well Steve Foerster, who runs the Space Coast Redemption Center in Central Florida, has set up an e-mail list for NORFED Redemption Centers and friends. Although I am new to this, I have already subscribed and you can too at: norfed-subscribe@topica.com. You don't have to

say anything in the message as it is processed automatically.

After you have subscribed you will receive a confirmation and a welcome message from Steve thanking you for signing up. Then you can send a message to the list by sending it to norfed@topica.com.

The list works like the egroup lists or the e-gold list if you are familiar with them except that it's hosted for free by Topica, a web site that does nothing but host lists for people.

Discussions will focus on NORFED, F*R*, IRS, The Liberty Dollar, Redemption Center issues and other issues of interest on liberty and monetary matters.

It is ready to be used. Now lets get started sharing all those great stories and ways that we can use more American Liberty Currency in the future to bring about the repeal of the F*R* and the IRS. There is no doubt that 3PSecure.com's 3PGold will be the solution for a great many people, but

there is still not an organization like NORFED to bring The Solution to the current immoral banking system. In fact, one reason why I lent my contacts and efforts to 3PSecure was that it would introduce NORFED to more people and help grow it towards its goals. Many thanks Steve for your support.

3. **Daniel New becomes a Redemption Center**

It is my pleasure to welcome Daniel New, a well-known national speaker and rights activist to becoming a Redemption Center a few months ago. As so many national figures have become RCs, it is important for all of us to be aware that the silent evolution of monetary reform through the NORFED Solution is progressing one RC at a time. Thank you Daniel for making a stand for value. Your efforts to return America to value - one Liberty Dollar at a time - is greatly appreciated.

4. **First RC in
Germany...but No
Delaware RC
yet...**

Well praise the Lord
and thank the Internet
for the means.
NORFED just
received its first
Redemption Center in
Germany... as liberty
knows no bounds.
And just as wonderful
as it is to see the
Liberty Dollar spread
around the world, it is
just as amazing that
try as so many people
have, NORFED has
yet to open a
Redemption Center in
Delaware. Interesting
that the State that cast
the tie breaking vote
for the US
Constitution in 1787
is the last State to
field one single
RC...with almost 100
RCs in California and
50 in Canada, I
simply wonder, is
there anyone awake
back there in
Delaware? If you
know of anyone,
please mention
NORFED and the
Liberty Dollar to
them. Remember you
receive \$100 referral
fee for every RC you
sponsor and there are
still a lot more people
out there to sponsor.

5. **Question of
the Month:
About the
ALCheck**

"Can I use my Credit Card to pay/order American Liberty Checks?" No, this is simply not possible. Please remember three things: 1.) The ALCheck is 100% backed by those dreaded Federal Reserve Notes - there is \$20 on deposit for every ALCheck issued. 2.) The ALCheck is exchanged for only a dollar over face (\$21) which must cover all costs. 3.) When you use your Credit Card, the merchant, i.e. NORFED in this case, pays a transaction fee. If NORFED was to accept a credit card for the ALCheck, with such a super thin margin, it would lose money - not something that this non-profit organization is allowed to do. Originally designed as an "ad specialty item" to popularize "FREE OUR MONEY" within the banking industry, you are encouraged to continue to use them whenever possible,

but please do not substitute the ALCheck for the actual gold and silver backed American Liberty Dollar - the real money.

6. **First Annual Philadelphia Freedom Conference with Ed Griffin and Bernard von NotHaus for NORFED**

The First Annual Philadelphia Freedom Conference will be held at the Hilton Valley Forge Hotel in the town King of Prussia, just north of Philadelphia on February 24.

Due the diligence of Al Wagner, one of NORFED's outstanding Redemption Centers this event will feature three major presentations by Ed Griffin - author of "Creature from Jekyll Island". Although there is much to be said about this major Conference, due to the late date of getting this Report posted, look for more info or

a NORFED "Alert!"
in the near future. But
plan for it now! One
of the best things
about the Conference
is that it will only cost
\$50 per person and if
you bring someone
who becomes a RC
you receive
\$100...what a wonder
way to make money
and help your
neighbor and your
country. Let's all get
together and have one
Righteous time! Hope
to see you and your
prospective RCs
there. You will not be
disappointed!

7. ***Quote of the
Month:***

*"None Are So
Hopelessly
Enslaved As Those
Who Falsely
Believe They Are
Free." -Johann W.
Goethe*

**Do you have a
favorite quote? If so
please email it to me
at:
bernard@libertydoll
ar.org**

**8. "Americans
are renting
our money"**

Important acknowledgm ent

It is not very often that a government official actually provides such clear insights into the current monetary situation or even tells the truth for that matter. But when it happens, we should all take notice as nothing happens by consequence with the government. For that reason, please read this statement by Rep. Jack Metcalf to the House of Representatives - September 09, 1999 and on the Weissbach program (570 KVI Seattle) on Aug. 7, 2000 talking about the benefits of the New Treasury Banks. Call (425) 825-5544 for a copy of the program. Many thanks to Pep Stofen/RC for bringing this article to my attention. Please note Appendix I.

9. "Renegade employers openly defy IRS"

Important Denver article

If you find Metcalf's interview interesting and you have any interest in the IRS...this article is a must read. The revolution by employers is spreading. First was the Florida case, then there was Arrow Plastics in Texas and another employer in California and now there are 60 employers banding together. Without the support of the employers as un-paid tax collectors, this current un-constitutional situation will not last for long. Again, it is my long held belief that the government is behind the demise of the IRS. Not that this revolution is not real nor anyone is a government agent, as I know a good many of these brave men and women, it is just that the government knows much better than you or I how many people have opted out of the IRS fraud. The government knows that if they don't do something with the IRS very soon they

may very well have a full-blown revolution on their hands as they can not control a country of well-informed citizens because then the citizens would be back in control of the government. Let the Internet and the individual sovereignty that is its nature reign. Many thanks to Cajun Mike/RC for sending this article to me. Please note Appendix II.

10. **Personal...Changes made to Christmas...**

After living through eight years of death to our rights and the politicization of our shared values it is enough to make one sick to read the news of the wholesale politicization of Christmas. Below is a small indication of how traditional value are being subverted by such morons who we have given such control to...My thanks to the RC who sent this:

1.) The city council of Little Rock, Arkansas, voted to change the name of their traditional December parade--always known as the Christmas parade--to the now politically correct "Holiday parade." That's right, the word "Christmas" was too

religious and might offend non-religious people or people of other faiths thought the city officials—so they changed the name. I can't wait until they find out the word "holiday" actually means "holy day."

2.) And from the deep South...in the traditional "Bible belt", some school districts in Georgia have instructed their teachers not to refer to "Christmas break" as "Christmas break" anymore. Too specifically Christian. Might offend somebody. It is now to be called "winter break."

3.) And in Eugene, Oregon, Jim Johnson, issued a directive banning—get this—Christmas trees from public places. You read that right he banned Christmas trees—from public places because the tree is a religious symbol and therefore—according to Mr. Johnson—cannot be displayed on city property. In his memo to all city employees, Johnson said that while it could be contended that the Christmas tree is a "holiday" or "seasonal" decoration "it is just as clearly a decoration associated with a religious holiday or tradition." Well, you go get 'em, Mr. Johnson! Round up those first amendment violating trees.

Heaven help US!!!

Thank you for making a stand for value and for being a part of NORFED.

Wishing you a belated Merry Christmas and a Happy New Year!

Appendix I: "Americans are renting our money"

Representative Jack Metcalf:
AMERICAN PEOPLE ARE
RENTING THEIR
CURRENCY !
Before the House of
Representatives - September
09, 1999

Rep. METCALF: "Mr.
Speaker, I would like to talk
briefly about money.
Everybody is interested in
money. My wife asked me:
"If you know so much about
money, how come we do not
have very much?" But I
would like to talk about
money this evening.

Did you know that we pay
rent on our money; the cash
we use, we pay rent on it? It
costs the American people
\$100 per person per year to
rent our cash, that is, the
paper money, from the
Federal Reserve.

Now, the Federal Reserve
gets the money, it just does
not spend that money or keep
it. They return it to the
Federal Treasury. That means
that the American people are
paying a tax on our money in
circulation for the privilege
of using Federal Reserve
notes. In reality, this money

is paid to the Fed by the Treasury to pay the interest on the U.S. bonds that back our money.

This is a foolish system when the U.S. Treasury could issue our currency directly without debt and without interest as they issue our coins. Most people do not know that our coins are minted by the Treasury, essentially spent into circulation, and the U.S. Treasury makes a neat profit on them.

But when we issue cash, we go further into debt. When the U.S. Government issues paper cash, they go further into debt because bonds are created to back the cash, and thus the debt increases.

With a currency we go into debt, but it makes a profit when coins are placed in circulation. This is truly a system that defies logic, and we should issue our coins or issue our cash as we issue our coins.

Here is a simple way to accomplish that; this is not complex, this is not rocket science. Congress only needs to pass legislation requiring the Treasury to print and issue U.S. Treasury currency in the same amount, in the same denominations, of the present Federal Reserve notes. No change in the money supply. The Treasury would issue these U.S. notes through the banks and at the

same time withdrawing a like amount of Federal Reserve notes.

As these Federal Reserve notes are collected by the U.S. Treasury, they must be returned to the Federal Reserve and essentially to redeem the over \$400 billion of U.S. interest bearing U.S. Treasury bonds now held by the Fed. So the Fed holds the bonds. We can take the U.S. currency and exchange it for those bonds. Over a couple of years we will have U.S. currency circulating instead of Federal Reserve notes, and the U.S. debt would be reduced by over \$400 billion.

That sounds too simple. Well, it is simple. This is not rocket science. There is no appreciable down side, and I expect to discuss this issue a lot in the future just because somebody needs to take a look at how our money was issued and allow us to avoid paying that \$27 billion a year interest just to rent our currency from the Federal Reserve."

Rep. Jack Metcalf was on the Weissbach program (570 KVI Seattle) on Aug. 7, 2000 talking about the benefits of the New Treasury Banks. Call (425) 825-5544 for a copy of the program.

Appendix II: "Renegade

employers openly defy IRS"

24 00 THE DENVER
POST_Sunday, November
19, 2000

SPECIAL REPORT

By David Coy Johnston

THE NEW YORK TIMES

Renega de employ ers openly defy IRS

LAKE SHASTA, Calif. ---
Al Thompson squeezed most
of his Company's 28
employees into a conference
room last month to say he
had good news: Income taxes
have to be paid by only a few
Americans, mostly those
working for foreign-owned
companies. So, he told the
workers, they would not have
to pay income taxes ever

again. His business was exempt, too, he said. No Social Security or Medicare taxes, either. The company was no longer withholding taxes from their paychecks, he said, or telling the Internal Revenue Service how much they made.

Thompson is part of a tiny but increasingly flamboyant fringe of American business. Arguing that the federal tax laws do not apply to them, these small companies are thumbing their noses at the IRS in a very public way: Not only have they stopped withholding taxes and turning them over, but they are bragging about it on Web sites and radio talk shows, and organizing seminars to promote the gospel of defiance.

They are boasting that they must be right because the IRS has not come after them, even though it knows what they are doing.

Indeed, the IRS not only has failed to pursue these businesses but has in some cases has given refunds after they claimed they did not owe taxes that had been paid earlier. In at least two cases, the businesses say they even received apologetic letters from the IRS for not rescinding penalties and issuing the refunds earlier.

Many tax experts express astonishment at the idea that the IRS is aware that

legitimate businesses are cheating, yet is not pursuing them. This undermines the principle on which the U.S. tax system is based, they say: People who do not pay their taxes will pay the consequences.

How many businesses are taunting the IRS this way is impossible to know. At least 23 have made their decisions public. Sixty business owners and their advisers met on the weekend of Nov. 11 in California to plan how to persuade thousands of others to join them.

Over the years, a number of individuals have claimed to be out of reach of the tax laws, but experts including former IRS commissioners said this wave was different. "This is tremendously significant because we have never before had responsible parties -- employers -- refuse to withhold," said Sheldon Cohen, a former IRS commissioner. "The system simply cannot work if they get away with this."

The IRS declined to comment on whether it was pursuing enforcement actions against the 23 employers, citing a law that protects taxpayer privacy. But there is no public record showing litigation or enforcement actions like liens against the companies' assets.

The failure of the IRS to act even against those that

openly defy the tax laws raises questions about the agencies ability to stop tax cheating. Asked whether the IRS was moving against any such tax resisters, the senior IRS spokesman, Frank Keith, would say only that "with limited resources, the IRS must often choose which cases to pursue" and that it focuses on those that will generate the most revenue.

But Jerome Kurts, another former commissioner, disagreed. "That's a nice pat line." he said, "but they don't go after only the people with the highest income -- they audit hundreds of thousands of returns under \$25,000 that produce little or no revenue -- and they can take resources from those."

END OF REPORT
