ALERT: Day 5 - Inflation Proof Currency Set to Double
April 19th, 2004

For immediate use: Please forward this press release to your list:

ATTENTION: On Wednesday, April 14, the 30 Day Moving Average (30DMA) crossed over $7.50 to $7.506 for the first time. Last Wednesday was DAY ONE of the thirty (30) consecutive days needed for the Liberty Dollar to “crossover”* to the new $20 Silver Base and DOUBLE! Today, Monday, April 19, will be DAY SIX if the 30 DMA stays over $7.50. If not, we start over. Either way, the inflation proof currency is set to double. Now it is only a matter of time.

The move started on Friday, March 19, when silver crossed over $7.50 per ounce and the phones started ringing. “Silver is over $7.50!!! Have we crossed over to the $20 Silver Base? Have you DOUBLED the face value of the Liberty Dollar?” You could feel the excitement over the phone. Bernard von NotHaus, the monetary architect who designed and developed the new gold and silver based currency confirmed that the “Crossover Point”* is without a doubt “the most exciting part of the Liberty economy”.

Von NotHaus explained that just as gasoline has doubled and silver has doubled from $4 to over $8 per ounce, now the Liberty Dollar is also set to double. That means every Liberty Dollar you have – will double in face value when the Silver base crosses over from the $10 to $20 Silver Base. In other words, if you have a one-ounce $10 Silver Liberty or $10 Silver Certificate – you will be able to exchange it for a new $20 Silver Liberty when the Crossover Point is reached.

Head turning? Maybe to some and to the new initiates into the world of emerging currencies but not to the supporters of the Liberty Dollar – already the second most popular currency in America. As the dollar continues to fall, and the price of silver rebounds from a half-century of manipulation and control, the face value of the Liberty Dollar is being driven by market forces to double.

As von NotHaus explained, “The Liberty Dollar is simply responding to the market. As silver doubles, the Liberty Dollar must double thereby exemplifying a truly ‘inflation proof currency’ that is the essence of a free market currency. And the best part is that everybody can participate. And should! Everybody can profit as Americans begins the arduous process to return our monetary system to value.”

David Morgan, the ‘Silver Guru’ who publishes “Silver Investor” (http://www.silver-investor.com) agrees with von NotHaus. “That is why I became a Liberty Associate. I like the Liberty Dollar because it makes economic sense and using it is the right action for our country. We need a currency backed by real substance, backed by gold and silver. Real value for real American.”

Richard H. Timberlake, an octogenarian PhD in Economics from the University of Chicago, has keenly followed the emerging story of the Liberty Dollar for years. He said he has been fortunate to have von NotHaus’ numerous overnight stops at his estate outside of Athens Georgia. And while he notes that his guest is often outspoken and intense, Timberlake defends the Liberty Dollar model as a functional substitute to the depreciating Federal Reserve Notes. He also chides the Federal Reserve for its policy: “Its money has no connection to gold; its activities are unconstrained by any law or principle; its policies are at the discretion of men (and women) who bear no responsibility for the results of their actions; the Fed is as unconstitutional as any institution can get.”
And with gasoline at double the price, the Liberty Dollar will certainly provide some extra purchasing power that we all will need – if you get it before it doubles. And even after it doubles, you can continue to use the new silver based currency at a discount for continued profits. As the US dollar has lost 40% of its value in the past two years in comparison to the euro, and silver has doubled just like gasoline, doesn’t it make sense to use a currency that not only reflects the current market prices but one that you can use at a profit?

* The Crossover Point of the Liberty Dollar from the current $10 Silver Base (one Troy ounce of .999 fine silver backs $10 Liberty Dollars) to the new $20 Silver Base (one Troy ounce of .999 fine silver backs $20 Liberty Dollars) will occur when the thirty day moving average (30DMA) for silver stays over $7.50 for thirty consecutive calendar days.

As the Crossover Point is so important, NORFED uses an independent, third party source for its 30DMA so there are no doubts. Just like the monthly audits, there is total transparency for the econometric features that were designed into the Liberty Dollar model to guard it against being whipsawed by an erratic silver market. You can follow the 30 DMA and watch it develop by simply going to ScotiaMocotta at http://www.scotiamocatta.com/prec/pdfs/pm_daily.pdf. Scroll down the Gold & Silver Market Watch. The 30DMA is at the bottom of page two.

Please take ACTION. Get as many Liberty Dollars as possible before the base doubles. Your family’s financial life might depend on it! Either change your money or lose your value – that is the choice. The Liberty Dollar is the solution.
